A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3617

DETAILED ACTION

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Claim 4 recites the limitation "the hand grip end of the rod" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lisowski (US 5,937,473). Lisowski discloses a boat implement that comprises an elongate cylindrical rod. The rod is curved (figure 13) and has a ridged hand grip (59) at one end and a tines (83) at the opposite end. The hand grip end has an aperture in which strap (60) is held. The implement is designed to float in the event that it is dropped in the water.

Application/Control Number: 10/047,929

Art Unit: 3617

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lisowski (US 5,937,473) in view of Nunziato et al. (US 3,993,013). The Lisowski rod has tines that are connected by a brace bar (reinforcing ribbing (80)). Lisowski does not disclose that the hand grip ridges are cross hatched. Nunziato discloses a boat implement with a hand grip (26) having cross-hatched ridges. The cross hatch ridges enhance the user's grip. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify the invention of Lisowski by using a hand grip with cross hatch ridges. The motivation would be to enhance the user's grip.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Urie, Jr. et al. discloses a boat cleaning implement that has a curved elongate rod. Sabella discloses a boat cleaning implement that has a two-piece angled rod with tines at one end. Cogswell discloses a boat cleaning implement.

Wesson discloses a boat implement that has exchangeable end attachments, including a tined attachment. Roach et al. discloses a boat hook that floats. Duckett discloses a boat hook with a hand grip with ridges. Lathan and Smith et al. each disclose an

Application/Control Number: 10/047,929

Art Unit: 3617

implement that has an elongate cylindrical rod that is slightly curved, one end of the rod having a tined section.

9. Any inquiry concerning this communication should be directed to examiner Andrew D. Wright at telephone number (703) 308-6841. The examiner can normally be reached Monday-Friday from 9:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Joe Morano, can be reached at (703) 308-0230. The fax number for official communications is 703-872-9326 for before final proceedings and 703-872-9327 for after final proceedings. The fax number for the examiner for unofficial communications is 703-746-3548.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist at (703) 308-1113.
